

Town of Lake Placid

Calculate Your Monthly Bill

Instructions:

- A. Water Base Facility Charge is a monthly charge for water service. Charge is base upon residential or commercial service and vicinity of service. This Base Facility charge is defined as “each customer’s portion of the treatment plant that is always there ready to provide water when needed.” If the customer closes their account and disconnects service, then that “portion” or “chunk” of all the equipment, pipes, pumps, chemicals, electric power and labor that is necessary for treatment, is given to someone else who signs up for service. If meter is larger than 1” other charges apply. (Column 1-4)
- B. Find rate on attached chart for Master Meters. (Column 5-8) There are different rates for residential and commercial service.
- C. The Water User Charge is calculated by gallons used per month. This is a flat rate, per 1,000 gallons, as specified in the attached chart. (Column 1-8) This is the same Column you used for the water base charge.
- D. Sewer Base Charge is a monthly charge for sewer service. Charge is base upon residential or commercial service for customers living within the Town limits. If meter is larger than 1” other charges apply. (Column 9 & 10)
- E. Find rate on attached chart for Master Meter Rates. There are different rates for residential or commercial Service. (Column 11 & 12)
- F. The Sewer User Charge is calculated by gallons used per month. This is a flat rate, per 1,000 gallons, as specified in the attached chart. (Column 9 – 12) This is the same Column you used for the sewer base charge.
- G. Sanitation service is available only for customers living within the Town limits. (Column 13)

Calculate your bill:

| | |
|----|---|
| \$ | A. Water Base Charge |
| \$ | B. Water Master Meter |
| \$ | C. Water User Charge |
| \$ | D. Sewer Base Charge |
| \$ | E. Sewer Master Meter 17.95 plus 16.25 each additional RI/28.85 – 568.25 CI |
| \$ | F. Sewer User Charge |
| \$ | G. Sanitation Base Charge |
| \$ | *Total Bill |

RI= Residential Inside Town Limits

CI= Commercial Inside Town Limits

Tips:

- Customers can only be charged for one base charge for each service. For example, if a customer is charged a based charge for a service they will not be charged a based charge for a master meter as well. In other words, A or B and D or E, if both services are rendered.
- There will be a water and sewer user charge, if both services are provided.
- Go down the list and select all the applicable fees that apply to you and calculate your total bill.
