

Important Information About Your Drinking Water

Town of Lake Placid Drinking Water Plants

SITUATION

The Town of Lake Placid public drinking water system failed to perform compliance monitoring for the Lead and Copper sampling for Magnolia and Sirena Water Systems, the required number of samples from residents was not met for calendar year 2023.

HEALTH EFFECTS

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not your drinking water meets health standards. During the calendar year 2023, we did not receive the required number of samples from residents and therefore cannot be sure of the quality of your drinking water (with respect to these contaminants) during that time.

WHAT SHOULD CUSTOMERS DO?

Although this water system did not receive the required amount of samples during the calendar year 2023, the results of the samples that were collected were within range of Department of Environmental Protection rules.

Customers need not take any action or seek an alternate water supply.

WHAT IS BEING DONE ?

The Town is now required to sample twice in a calendar year for Magnolia & Sirena Water System.

Tomoka Water System and Highway Park Water System were not affected and will be sampled as normal in 2024.

ADDITIONAL INFORMATION

For more information please contact Leigh Anne Bemis at 863-699-3747

Or you may contact the Department of Environmental Protection at (239) 344-5615.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly. You can do this by posting this notice in a public place or distributing copies by hand or mail.
